

Votus will be offering white-labeled closed social networks

November 3, 2021

Votus is now offering our clients the ability to host their own white-labeled closed social networks. Organizations can invite their targeted audiences to join a white-labeled closed social network that will enable their community to grow, engage, and foster new ideas.

GROW YOUR COMMUNITY

A closed social network allows an organization to further establish a sense of mutual effort aimed at a larger mission for communities to develop and grow.

ALLOW YOUR COMMUNITY TO ENGAGE WITH EACH OTHER

Thanks to the buzz your closed social network is able to generate, your community will continue to engage with each other and initiate organic posts that will spread to other networks.

SAFER SOCIAL MEDIA EXPERIENCE

The closed social networks offered by Votus come with effective anti-abuse tools and strict codes of conduct to help protect your organization and audience.
